## Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities all the institute where the work has been carried out; that, if an when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

Manuscripts must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.

Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 85-23, revised 1985) were followed, as well as specific national laws (e.g. the current version of the German Law on the Protection of Animals) where applicable.

The managing editors reserve the right to reject manuscript that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfill the above-mentioned requirements.

All articles published in this journal are protected by copyright, which covers the exclusive right to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

*While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.*

*Special regulations for photocopies in the USA*

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for an copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A OS2, Canada (Tel: 613-993-9251; Fax:613-952-8243; e-mail: cisti.docdel@nrc.ca).

# Contents of Volume 79

Abramovich-Sivan S, Akselrod S: A pacemaker cell pair model based on the phase response curve 77
Abramovich-Sivan S, Akselrod S: A single pacemaker cell model based on the phase response curve 67
Ademoğlu A → İsoğlu-Alkaç U
Akselrod S → Abramovich-Sivan S
Anand T → Minai AA
Anastasio TJ: Nonuniformity in the linear network model of the oculomotor integrator produces approximately fractional-order dynamics and more realistic neuron behavior 377
Arabyan A, Tsai D: A distributed control model for the air-righting reflex of a cat 393
Aurell E → Ullström M

Ballain T, Litaudon P, Martiel J-L, Cattarelli M: Role of the net architecture in piriform cortex activity: analysis by a mathematical model 323
Barna G, Grőbler T, Érdi P: Statistical model of the hippocampal CA3 region II. The population framework: model of rhythmic activity in the CA3 slice 309
Barna G → Grőbler T
Bartsch H → Silipo R
Basar-Eroğlu C → İsoğlu-Alkaç U
Beek PJ → Peper CE
Bobbert MF → van Zandwijk JP
Bozis A, Moschovakis AK: Neural network simulations of the primate oculomotor system III. An one-dimensional, one-directional model of the superior colliculus 215
Breniere Y, Ribreau C: A double-inverted pendulum model for studying the adaptability of postural control to frequency during human stepping in place 337
Bülthoff HH → Franz MO

Cattarelli M → Ballain T
Cesar Jr RM, Costa LdF: Neural cell classification by Wavelets and multiscale curvature 347
Costa LdF → Cesar Jr RM
Cruse H → Steinkühler U

Deco G → Silipo R
Demiralp T → İsoğlu-Alkaç U
Doppelmayr M, Klimesch W, Pachinger T, Ripper B: Individual differences in brain dynamics: important implications for the calculation of event-related band power 49

Ekeberg Ö → Wadden T
Érdi P → Barna G
Érdi P → Grőbler T

Franz MO, Schölkopf B, Mallot HA, Bülthoff HH: Where did I take that snapshot? Scene-based homing by image matching 191

Gaudiano P, Przybyszewski AW, van Wezel RJA, van de Grind WA: Spatial asymmetries in cat retinal ganglion cell responses 151
Grill WM → McIntyre CC
Grillner S → Ullström M
Grőbler T, Barna G, Érdi P: Statistical model of the hippocampal CA3 region I. The single-cell module: bursting model of the pyramidal cell 301
Grőbler T → Barna G

Harlaar J → van Zandwijk JP
Hauske G, Kirschfeld K: Editorial 443
Hellgren Kotaleski J → Ullström M
Hof AL → van Zandwijk JP
Holly JE, McCollum G: Timing of secondary vestibular neuron responses to a range of rotational head movements 39
Horikawa Y: Bifurcations in the decremental propagation of a spike train in the Hodgkin-Huxley model of low excitability 251
Hoshino O, Kashimori Y, Kambara T: An olfactory recognition model based on spatio-temporal encoding of odor quality in the olfactory bulb 109
Hultsch H → Todt D
Hung G → Sun W

İsoğlu-Alkaç Ü, Basar-Eroğlu C, Ademoğlu A, Demiralp T, Miener M, Stadler M: Analysis of the electroencephalographic activity during the Necker cube reversals by means of the wavelet transform 437
Ito M → Luo Z

Jungwirth PJ, Rawicz AH, Lakowski R: Applications of neural networks to colour recognition 361

Kaiser M → Yeghiazarian L
Kambara T → Hoshino O
Kashima T, Isurugi Y: Trajectory formation based on physiological characteristics of skeletal muscles 277
Kashimori Y → Hoshino O
Klimesch W → Doppelmayr M
Korogod SM, Kulagina IB: Geometry-induced features of current transfer in neuronal dendrites with tonically activated conductances 231
Kulagina IB → Korogod SM

Lakowski R → Jungwirth PJ
Lansner A → Ullström M
Latash ML → Zatsiorsky VM
Levine MW: Models for the cross-correlation between retinal ganglion cells 367
Levy WB → Wu X
Litaudon P → Ballain T
Lörincz A: Forming independent components via temporal locking of reconstruction architectures: a functional model of the hippocampus 263
Luo Z, Ito M: Diffusion-based learning theory for organizing visuo-motor coordination 279

McCollum G → Holly JE
McIntyre CC, Grill WM: Sensitivity analysis of a model of mammalian neural membrane 29
Mallot HA → Franz MO
Martiel J-L → Ballain T
Meinhardt G, Mortensen U: Detection of aperiodic test patterns by pattern specific detectors revealed by subthreshold summation 413
Miener M → İsoğlu-Alkaç U
Miller RA → Thaut MH
Minai AA, Anand T: Stimulus-induced bifurcations in discrete-time neural oscillators 87
Mon-Williams M, Tresilian JR: A framework for considering the role of afference and efference in the control and perception of ocular position 175
Mortensen U → Meinhardt G
Moschovakis AK → Bozis A

Ojala J: Adaptive behavior with protozoa-inspired dynamics 403

Pachinger T → Doppelmayr M
Peper CE, Beek PJ: Are frequency-induced transitions in rhythmic coordination mediated by a drop in amplitude? 291
Przybyszewski AW → Gaudiano P

Radicheva N, Slavcheva G: Spectral and time domain characteristics of single muscle fibre action potentials during continuous activity extracted from model considerations 427
Rawicz AH → Jungwirth PJ
Ribreau C → Breniere Y
Ripper B → Doppelmayr M
Ronacher B: How do bees learn and recognize visual patterns? 477

Schauer LM → Thaut MH
Schneider N, von Campenhausen C: Color and lightness constancy in different perceptual tasks 445
Schölkopf B → Franz MO
Schweighofer N: A model of activity-dependent formation of cerebellar microzones 97
Silipo R, Deco G, Vergassola R, Bartsch H: Dynamics extraction in multivariate biomedical time series 15
Slavcheva G → Radicheva N
Stadler M → İsoğlu-Alkaç U

3/99 31249-200

Steinkühler U, Cruse H: A holistic model for an internal representation to control the movement of a manipulator with redundant degrees of freedom 457
Sun F → Sun W
Sun W, Sun F, Hung G: Neural network mosaic model for pupillary responses to spatial stimuli 131

Tegnér J → Ullström M
Thaut MH, Miller RA, Schauer LM: Multiple synchronization strategies in rhythmic sensorimotor tasks: phase vs period correction 241
Todt D, Hultsch H: How songbirds deal with large amounts of serial information: retrieval rules suggest a hierarchical song memory 487
Tresilian JR → Mon-Williams M
Tsai D → Arabyan A
Tyrcha J → Wu X

Ullström M, Hellgren Kotaleski J, Tegnér J, Aurell E, Grillner S, Lansner A: Activity-dependent modulation of adaptation produces a constant burst proportion in a model of the lamprey spinal locomotor generator 1

van de Grind WA → Gaudiano P
van Wezel RJA → Gaudiano P
van Zandwijk JP, Bobbert MF, Harlaar J, Hof AL: From twitch to tetanus for human muscle: experimental data and model predictions for m. triceps surae 121
Vergassola R → Silipo R
von Campenhausen C → Schneider N
von Helversen D, von Helversen O: Acoustic pattern recognition in a grasshopper: processing in the time or frequency domain? 467
von Helversen O → von Helversen D
von Weizsäcker C → von Weizsäcker EU
von Weizsäcker EU, von Weizsäcker C: Information, evolution and "error-friendliness" 501

Wadden T, Ekeberg Ö: A neuro-mechanical model of legged locomotion: single leg control 161
Wu X, Tyrcha J, Levy WB: A neural network solution to the transverse-patterning problem depends on repetition of the input code 203

Yeghiazarian L, Kaiser M: Role of temperature in quanta mechanisms of facilitation in the frog neuromuscular junction 59

Zatsiorsky VM, Zong-Ming Li, Latash ML: Coordinated force production in multi-finger tasks: finger interaction and neural network modeling 139
Zong-Ming Li → Zatsiorsky VM
